Dear Mr. Albano:

Thank you for your information request regarding the site above. Lists of endangered/threatened plants and animals, and Illinois Natural Areas Inventory sites are given below. Maps are marked for approximate locations for plants (P) and animals (A) and natural areas (NA.)

Occurrences include:

Bartramia longicauda, upland sandpiper, IL endangered bird
Felis rufus, bobcat, IL threatened mammal
Haliaeetus leucocephalus, bald eagle, IL and federally endangered bird
Thryomanes bewickii, Bewick's wren, IL endangered bird
Eryngium prostratum, eryngo, IL endangered plant
Cambria Neck NA

Some of the occurrences listed are several miles from the water path, but they were nonetheless included because they occur in the same water body and are thus affected by the same environmental disturbances that would affect the water path.

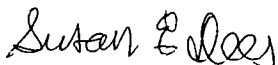

Please be aware that the Natural Heritage Database cannot provide a conclusive statement on the presence, absence, or condition of significant features in any part of Illinois. The reports only summarize the existing information regarding the natural features or locations in question known to the Division of Natural Heritage at the time of the inquiry. The reports should not be regarded as final statements on the site being considered, nor should they be a substitute for field surveys required for environmental assessments.

I cannot charge you for the search of our database, but I would like to urge your support of the Illinois Natural Heritage Database by thanking you in advance for your contribution of \$30.00 to the Illinois Wildlife Preservation Fund. Such contributions may be mailed to the above Springfield address. We appreciate your support of this important source of information.

Recently you have sent us checks with your requests. This request contained a receipt but no check, which we will be happy to sign and return upon receipt of your check.

If you need additional information or have any questions, please do not hesitate to contact me at 217-785-8290.

Sincerely,

A handwritten signature in cursive script that reads "Susan E. Dees".

RE: Perma-Treat

Attention: Susan E. Dees

Please provide the necessary information on endangered or threatened species and natural areas that are within the attached study areas. Three maps are enclosed defining the study areas. There is one map that combines the four mile radius and 15-Mile downstream map.

We will require a receipt for our donation, therefore, attached is a letter of acknowledgement, which will serve as receipt. As always, thank you for your time and attention.

Very Truly Yours,

Jeff M. Albano
